The Alba model:

### FUNCTION AND DESIGN

Single-family house, on the ground floor. Model that allows its isolated construction, or attached, as shown in the images.

Simple design and strong shapes. Continuity of the main lines of the house, creating an envelope that folds back and generates the volumes of the house. The living room opens onto a generously sized paved space or terrace.

### ORGANIZATION OF SPACES

The house is structured in two differentiated areas, with a hall space that separates and differentiates the nucleus during the day, with the kitchen and the living room. In a more private area, the night area, with 3 independent rooms. Includes suite.

### \*\* ADDITIONAL EQUIPMENT:

Possibility of personalizing the home with the incorporation of finishes with composite panels and ventilated façade, giving easy integration to the design. Possibility of modifying the colors of the finishes.

Not included in the price: \* taxes \* Work license \* Gardens \* swimming pools \* perimeter closure.

This trim level does not feature heating or air conditioning. Ask us.

CEE A with aerothermal option. Construction is level 'A'.
